

Privacy Policy

Relief Validation Limited (“RVL,” “we,” “our,” or “us”), as the authorized provider of VeriQR (the “App”), is committed to protecting your privacy. This Privacy Policy explains how VeriQR handles personal information.

1. Information We Do Not Collect

VeriQR performs verification entirely on-device. It does not collect, store, transmit, or process any personal information about you or any certificate holder, including names, contact details, location data, device identifiers, IP addresses, or images beyond the moment they are processed.

2. How VeriQR Works

VeriQR uses cryptographic and digital-signature verification to authenticate QR-coded certificates (Visible Digital Seals). It reads the encrypted data embedded in a VDS code and uses a securely embedded digital certificate solely to decrypt and verify the signature. All scanning and verification occur locally on your device — nothing is uploaded to RVL servers or any third party.

3. Permissions Used

VeriQR requests Camera access solely to scan a QR/VDS code in real time; no images or video are recorded or stored. No other device permissions (contacts, microphone, location, etc.) are requested beyond what is needed to open a document you choose to verify.

4. Data Security

Verification runs in a secure, encrypted, isolated environment on your device. The embedded cryptographic certificate is tamper-protected, and we perform regular security audits and updates.

5. Children’s Privacy & Third Parties

VeriQR does not knowingly collect personal information from anyone, including children, and does not integrate third-party analytics, advertising, or data-sharing services.

6. Changes to This Policy

We may update this Privacy Policy to reflect changes in technology, legal requirements, or operations. Updates will be posted here with a revised effective date.
